Token Up!

Hello!

We are here to talk about our app Token Up! That will be the future trading centre for NFTs

The Team

- ★ Nihal Mhatre
- ★ Ishita Srivastava

1

What the heck is NFT ?

Let’s know more about NFT’s first.....

A non-fungible token is a financial security consisting of digital data stored in a blockchain, a form of distributed ledger. The ownership of an NFT is recorded in the blockchain, and can be transferred by the owner, allowing NFTs to be sold and traded.

How does a NFT work?

- Nfts give the ability to assign or claim ownership of any unique piece of digital data.
- Which is trackable by using Blockchain as a public ledger.
- Each individual token is completely unique and is not divisible.

Trading

Our main goal is to establish a trading centre where users can sell or buy products through NFT’s

Creating a non-trackable safer trading space

NFTs (non-fungible tokens) are unique cryptographic tokens that exist on a blockchain and cannot be replicated. NFTs can represent real-world items like artwork and real estate. "Tokenizing" these real-world tangible assets makes buying, selling, and trading them more efficient while reducing the probability of fraud.

Price index of top three crypto currencies {In $}

	2020	2021	2022
Bitcoin	10,000	58,000	62,000
Ethereum	500-900	6,000	3,500
Tether	600-900	650-800	900-1,000

Maps

3,38,000,000

The total assets net worth of NFT MARKET

3,38,000,000$

Currents net worth of the market

25,930,000 users

And a lot of users

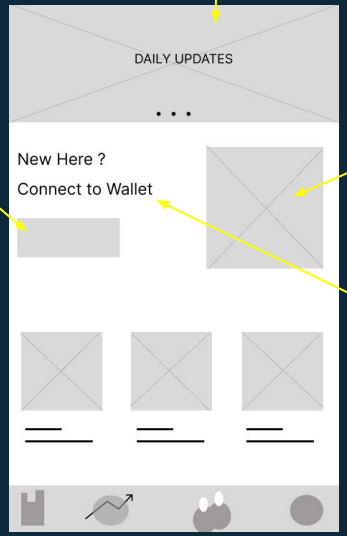
A Promising Future indeed

For users who look forward on using this app!

Early Wireframes of our work

Grey box with crossed lines depict an image

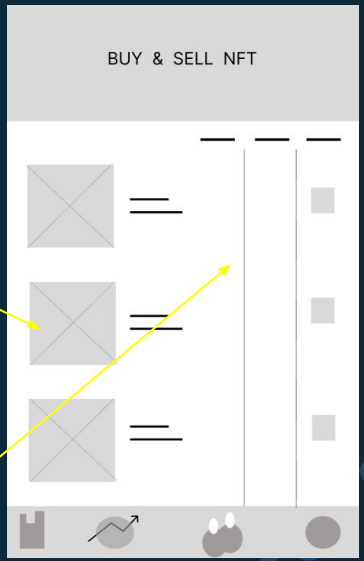
A plain box indicates buttons



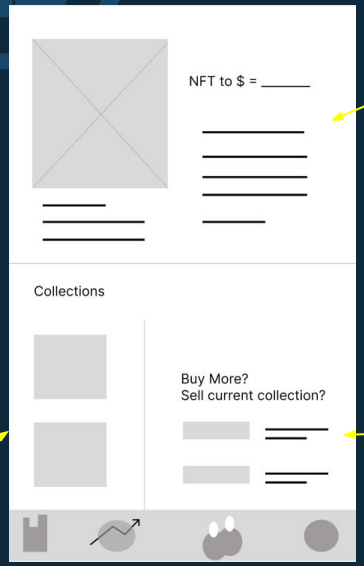
Here an illustration has been represented

Home page, asking the user if they are new to connect wallet to continue transactions

Images/NFTs represented through box



Explore page displaying different NFT's , their growth rates , loss rates , Buying options



Displays the total net worth of the user's NFTs into USD $

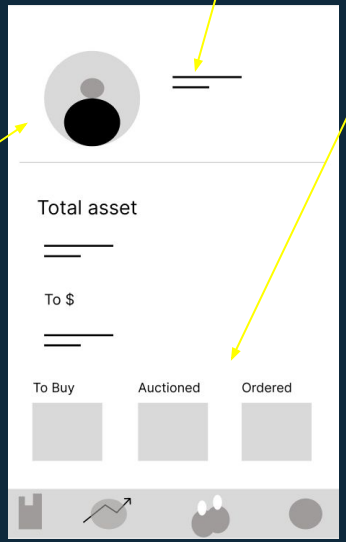
A user centered prompt regarding assets

Display of user's collections

User's Profile info

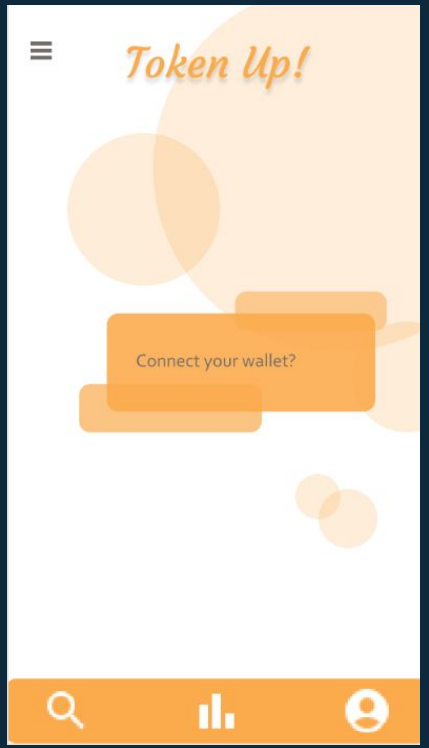
User's collections including daily sales, auctioned products bought products and wishlists

User Profile has been displayed with their net worth in $ and crypto



Latest designs for our app

We've also provided a temporary demo version of the app.
Here.



Thanks!

Any questions?
